
Algorithm 1 compute sum of integers in array

```
1: procedure ARRAYSUM( $A$ )  
2:    $sum = 0$   
3:   for each integer  $i$  in  $A$  do  
4:      $sum = sum + i$   
5:   end for  
6:   Return  $sum$   
7: end procedure
```
